

Colville Delta Lakes

Results of 1995 Sampling

Lawrence Moulton
MJM Research
5460 NE Tolo Rd
Bainbridge Island, WA 98110

Areas sampled for fish in 1995 (shading indicates lakes that have been sampled; shaded lakes outside designated areas were sampled in prior years).

Numbering Convention for Colville Delta Lakes:

The lake number contains several pieces of information, including the code of the sampler and the year of sampling.

Sampler Code:

MC = McElderry and Craig (1981); sampling in 1979

B = Bendock and Burr (1986); sampling in 1985

L = Lobdell; water quality sampling in 1991-1994

M = Moulton; fish sampling in 1991-1993 and 1995

First Two Numerals:

Year of Initial Sampling

(if Moulton sampled a lake previously sampled by Bendock, then the Bendock lake number is used)

Last Two Numerals:

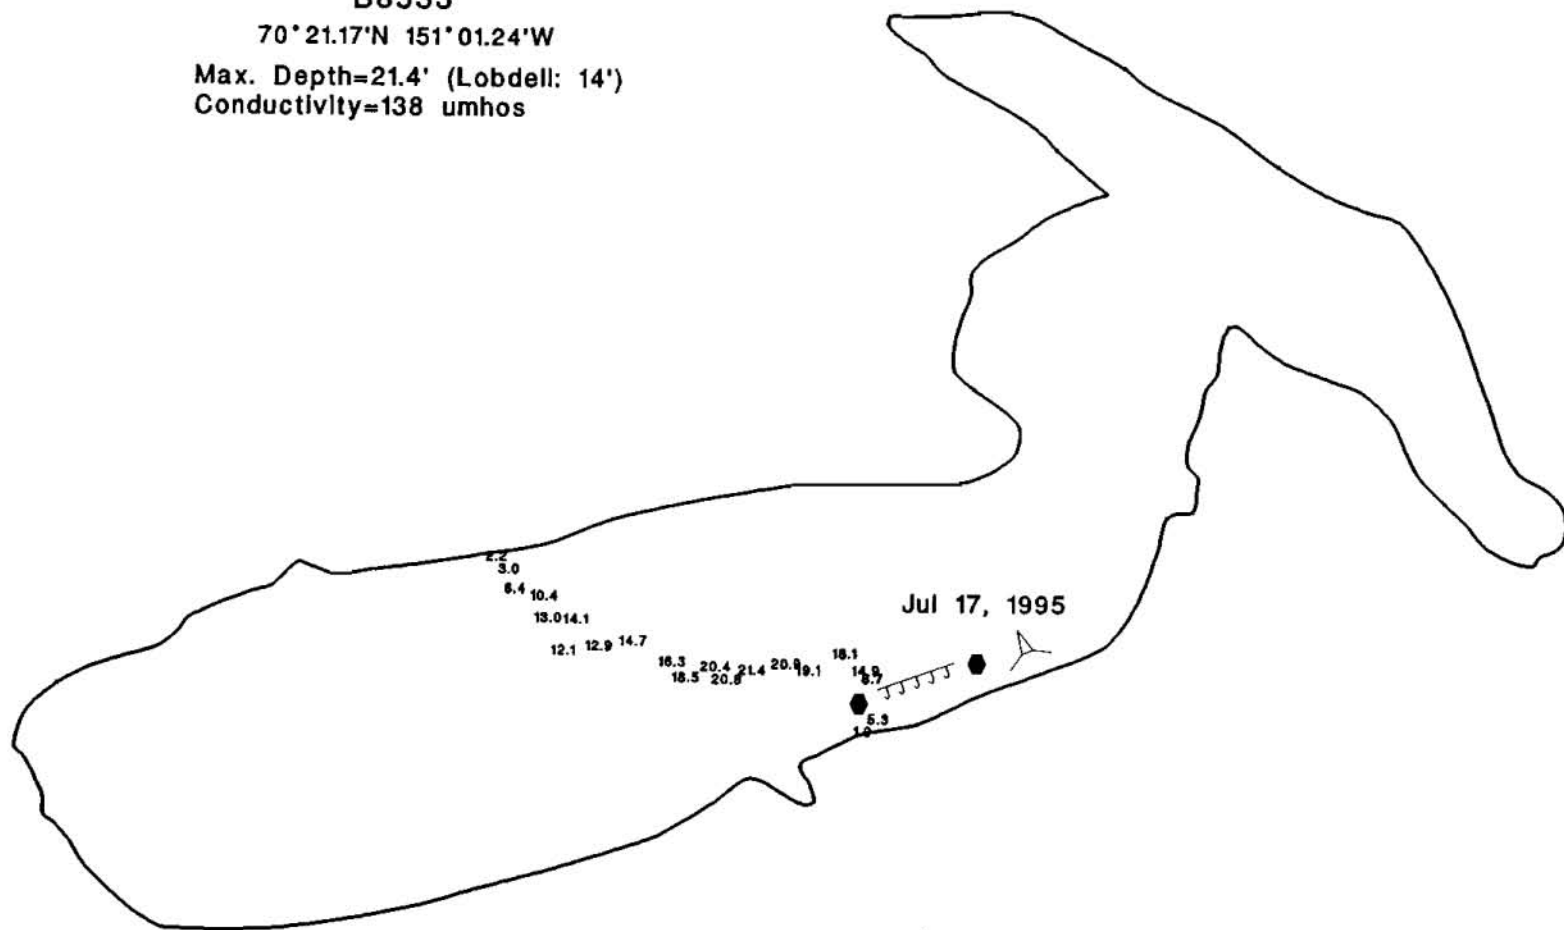

Numbers from 1 to 99 used to identify the individual lake sampled within a given year.

Bathymetric Transect = Depth in Feet
